

MISSION MALAWI

Monthly Newsletter of what God is doing in Malawi through the READSON family with support from *Disciplers International Inc.*

OCTOBER, 2020

A MAJOR GOAL HAS BEEN ACHIEVED!

HELLO, FRIENDS! Our project, which has been underway for years, just reached another goal, and we're excited! As some of you know, we started the Community Hall project about five years ago, one brick after another, until the walls were up. At this time, we are no longer talking about walls or a roof, but windows and doors! This third goal has now been attained, thanks to the generous donations provided by those supporting the mission work of *Disciplers International*. - Patrick Readson

Windows & Doors complete Step 3 in our Community Hall project

After two months of hard work by many volunteers guided by a few professionals, walls were up, and looking good! The roof was installed next, and now windows and doors, Spirits are also up, and the hearts of our volunteers are encouraged.

The final steps include installing a concrete floor, plastering walls, paint, plumbing and electrical.

Despite many challenges, Marvis and I have big dreams. We thank God that the challenges are resulting in success, one brick at a time. Just now we are praising God in our Community Hall. God is good! Having a multipurpose facility for church services, community events and job training is wonderful blessing. This is possible, because we (you and us) are serving together to make these dreams come true!

Our Ministry extends beyond Malawi to Mozambique. We have great faith in God and great love for people. Our long-term plan with God's help is to see Malawians become financially Independent through small-scale business startups, which will help people support themselves, their families & God's work in our communities. Look forward to hearing more about that in the next edition of MISSION MALAWI.

Prayer Requests:

- Full-time jobs for Christopher (brother of Mervis) and Edward (brother of Patrick)
- Success with the small business plan that Mervis is developing to create jobs
